

CHALLENGER 604

4,000 NM
7,400 km

The competitive business jet with a wide cabin

With its range of 8 hours non-stop, this large aircraft offers a spacious cabin which perfectly combines working, dining and relaxing spaces for up to 12 passengers, fully equipped for business (integrated communication systems), entertainment (Blu-ray/DVD player), as well as a wide baggage compartment that is accessible in flight. It performs equally well on short and long-distance trips; thanks to its short-field performance, the Challenger 604 can use restrictive airports with just 1,500 m long runways, hence increasing the number of possible landing places. Passengers will be closer to their final destination and will gain a substantial amount of time.

The sleeping configuration offers three single and one double bed accommodation.

Fine dining is served on board by our flight attendant.
