

# GLOBAL XRS

6,000 NM  
11,200 km

## The ultra long-range business jet

This time-saver can fly 13 hours non-stop at high speed, taking up to 10 passengers anywhere in the world in an exclusive, luxurious and particularly comfortable environment, fully equipped for business (integrated communication systems), entertainment (DVD) and relaxation. Thanks to its short-field performances, the Global XRS can use restrictive airports with just 1500 m long runways, thus bring passengers closest to their final destination and consistently reduce their travel time.

The aft section, separated from the cabin by a sliding door, is designed as a relaxing room equipped with individual beds. It can also easily be converted into a comfortable king size double bed suite, with direct access to a private restroom and closet as well as to the baggage compartment. The mid-section offers two single and one double bed accommodation.

Fine dining is served on board by our cabin crew personnel.

Passengers 10

Crew 2 pilots - 1 flight attendant
