foreword

"You are in complete control over your travel, you may take along whatever and whomever you need to do your business effectively.

You and your staff can confidently fly wherever you need to, go anywhere in the world. You can fly with confidence and tremendous comfort. Just think at the convenience of being free from the hassles of commercial airline schedules, long lines, lost luggage and wasted time! That's why more people every day discover how smart chartering an aircraft can be whether for business or pleasure".

Yours faithfully, lonut Casuneanu President

cessna XLS +

The XLS+ combines the big cabin comfort of a midsize jet with the flexibility lts docile, straight-wing handling characteristics enable the and freedom of a light jet. Its interior was custom made and designed to XLS+ to take off and land at slower speeds on shorter runways. performance and the largest external baggage compartment in its class.

Why fly with our Cessna Citation XLS+ ?

- ability to travel to meetings in multiple cities on the same day with the flexibility that only a private jet can provide you, avoiding all unnecessary connecting flights and layovers.
- expedited Security clearance, which means there is no waiting in line (VIP Lounge)
- absolutely privacy
- flying in a private jet, executives will be able to work uninterrupted
- having a flexible schedule and ability to change whenever its
- enjoy best food on board with our first class catering
- fly like in your own "luxury and comfort" aircraft

cessna XLS+

Once you are on board, relax and experience an impeccable service over 13,000 meters up. The sky, tailor-made to you. Up to the latest detail. Newspapers, individualised hostess service, communications and, above all our exclusive and personalized catering service.

With all this space, you have the freedom to stand up and walk unhindered up and down the entire length of the cabin.

Choose your preferences from a varied menu, which is always of highest quality. With vegetarian or diet options. Sophisticated creations or any special request? Enjoy our fine selection of wines or ask for the one you prefer. Just like in your favourite restaurant, but this time for you and your guests only.

In addition, the standard auxiliary power unit provides a comfortable cabin temperature while on the ground - even before the engines are started.

eurocopter 135 P2+

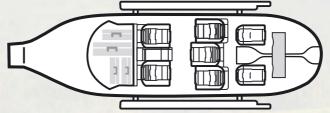

The EC135, featuring Eurocopter's latest technological developments such as an advanced cockpit design, modern avionics, the Fenestron anti-torque device and a bearingless main rotor system, provides outstanding performance and maneuverability.

Quiet and cheaper to operate than any other twin-engine helicopter in its class, the aircraft is also equipped with safety equipment such as energy-absorbing fuselage and passenger and crew seats, along with crash-resistant fuel cells.

EC135 passengers enjoy an exceptionally fast, smooth ride, thanks to its bearingless main rotor and innovative Fenestron tail rotor system.

The EC135 offers unsurpassed external visibility during flight—passengers can sit back and soak up the extraordinary view. And with its low noise and vibration levels, the atmosphere is both pleasant and restful for passengers and crew.

aircraft management

24 hours a day, 7 days a week, 365 days a year, we are with you

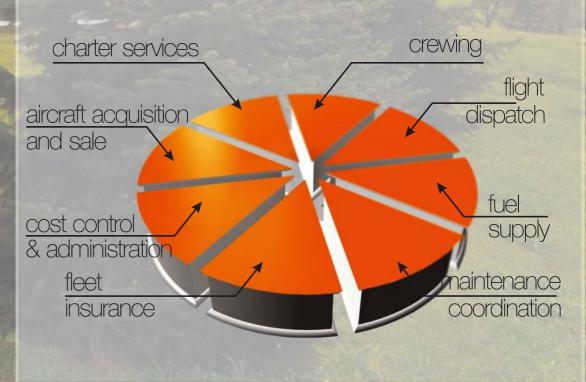

Our clients will receive a five-star service never having to deal with any of the operational issues associated with aircraft ownership (i.e. aviation regulatory compliance, aircraft maintenance coordination, staff recruitment and productive aircraft operation).

Our aircraft management program is designed to be flexible, cost efficient and serve the aircraft owner's best interests. C&I Corporation is manned by aviation experts that can assist aircraft owners in managing their own aircraft. In order to reduce aircraft operational costs, many owners find it convenient to use their aircraft for commercial flight operation. The C&I Corporation commercial department will organize a commercial charter flight on your aircraft at any time. Our managers work 24 hours a day to handle and respond to the requests of our clients, ensuring stability and safety of flight operations.

Services

Amongst other things, our services include:

- Providing advice in choosing a suitable aircraft type, its technical equipment and cabin amenities.
- Negotiating optimal contractual conditions with third parties (insurance companies, maintenance companies, etc.)
- Specialist accompaniment of the aircraft delivery process
- Comprehensive execution of all guidelines imposed by authorities
- Drawing up an individual operating model
- Transparent and timely billing methods
- Drawing up a budget for the aircraft
- Cost control by way of consistent recalculation of all flights
- Recruitment, licensing, training, further education of cockpit and cabin crew
- Planning, supervision and execution of the technical aspects of aircraft maintenance by our maintenance team (link to page below)
- Fuel supply services
- Competent operations centre 24/7

maintenance

Safety does not stop at the high qualification of the crew and ground services, nor does it end with a working and reliable aircraft. The word "safety" means much more to many of our clients. In the same way that does for us. ONL Corporation has a Maintenance Organization Approval Certificate is:

"safety" means much more to many of our clients. In the same way that it

C&I Corporation has a Maintenance Organization Approval Certificate issued by the Romanian Civil Aeronautical Authority for both base and line

C&I Corporation technical services EASA approved include:

- Daily checks; after last flight of the day checks
- Major inspection and airframe modification
- Avionics repair and installation services
- Spare parts services
- Pre-purchase inspection
- Assistance to delivery of new aircraft
- Long term storage management
- Interior refurbishing
- Scheduled and unscheduled maintenance

It is a feeling of comfort when travelling at speeds close to the speed of sound. It is not feeling the difference between being onboard and lying home on the sofa. It is being around only those people who you wish to see. It is confidence in the crew and their responsibility over those onboard. It is being able to choose any destination without noticing the duration of the flight.
